

Discover the hidden value within your data

Business Intelligence and Data Warehousing Services

IT Convergence Technology Services offers Oracle Business Intelligence services that give you the information you need to make good decisions. Traditionally, Business Intelligence and Data Warehousing deployments have been measured in months or years. IT Convergence's unique BI Applications deployment methodology starts bringing you visibility to your data in the second week, allowing management and end users an opportunity to see how Business Intelligence will change their lives. We can do this because we focus on OBIEE's out-of-the-box BI Analytics components that we integrate directly with your Oracle E-Business Suite.

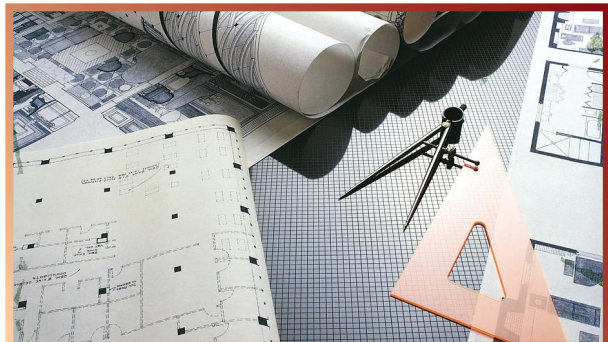

Is entering data easier than getting it out? Do you have complete confidence that you are looking at your Oracle E-Business Suite Data correctly? If you've found yourself asking these questions, you are not alone in the business world. Executives make business decisions based on how data is presented to them. But most business data is drawn from disparate sources making achieving consistent reporting standards a challenge for all organizations.

IT Convergence (ITC) will work with you to analyze your needs and help you determine which Business Intelligence tool will establish One Source of Truth

for all business data. Our solutions go beyond simply providing consistent reports. What does this mean? A reporting solution simply organizes your information to tell you what you already know. ITC's Business Intelligence solutions tell you what you do not know. Business Intelligence unlocks the value hidden within your data by providing you with insights into cost-centers and profitability margins.

INSTALLATION / CONFIGURATION / UPGRADES / MIGRATIONS

ITC can successfully install, configure, or migrate you to the latest OBIEE (Oracle Business Intelligence Enterprise Edition) offerings. We can also upgrade your Discoverer

environment to OBIEE, allowing you to leverage your investment in Discoverer, while still taking advantage of the latest, integrated Oracle Fusion middleware. ITC also saves you time and money during an implementation's development phase by installing pre-built virtual machines on your existing hardware. By doing this, we quickly bring on-line a development environment which can be scaled up into a multi-tier, multi-node production environment later. ITC's OBIEE implementation methodology is also secure because we can implement any of the Oracle Single Sign-On and Provisioning products on top of the BI and Data Warehousing stack.

FAST FULL-SCALE SOLUTION IMPLEMENTATIONS

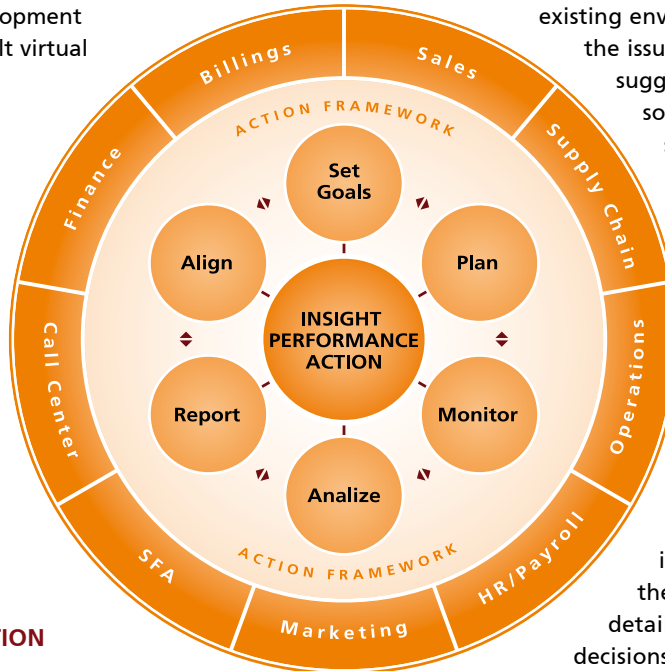

ITC is ready to rollout comprehensive ultra-fast projects such as a multi-terabyte data warehouses and global-scale business intelligence solutions against the E-Business Suite. We are flexible: ITC can provide technical expertise and project management for a team comprised of your staff, or our onshore and Nearshore teams can drive the solution. Regardless of your needs, we have the experience and leadership necessary to ensure a successful project the first time.

HEALTH CHECKS

ITC conducts Health Checks to comprehensively evaluate existing business intelligence systems and develop detailed plans to remedy pain points and improve performance. Clients frequently request advice on

specific issues such as data warehouses that do not load fast enough, inconsistent data quality, and slow response times.

During our Health Checks we analyze your existing environment and validate the issues you are having, and suggest solutions, which we sometimes implement on the spot. At the end of every Health Check we deliver an analysis of your current environment and detailed recommendations for improvements. What sets us apart is we tell you exactly what to change, how to change it, the reason we are suggesting the change and business impact if you do not make the change. You know all the details, and can make informed decisions about how to get the most out of your investment in a business intelligence solution.

THE ROAD TO IMPROVED COMPETITIVENESS THROUGH BETTER DECISION MAKING

OBIEE helps you forecast trends, detect changes in market dynamics, discover hidden costs centers, and assess your own capabilities, and in today's market insights like these are vital to maintaining competitiveness. In as little as 16 weeks ITC can deploy a cost-effective Business Intelligence solution that provides executives with the information they need to reduce costs and maximize profitability.
