COST-EFFECTIVE AND ACCESSIBLE DEVELOPMENT

IT Convergence (ITC) has proven expertise in delivering quality software development. ITC's Development Services Center makes software development services affordable, effective, and accessible. Our project-based Nearshore development and our Staff Leasing services give you flexible options for accessing skilled resources at reduced costs.

By working with the IT Convergence Development Services Center in Buenos Aires, Argentina, your company will realize a number of tangible benefits:

▶ **Commitment to Quality**

The Development Services Center staff's collective expertise is both deep and well-integrated, assuring you service continuity, solution quality, and on-time delivery.

▶ **New York Business Day**

Buenos Aires shares its business day with New York, meaning your project team is available by phone when you need them.

▶ **World Experience**

The Development Services Center's team has an excellent command of English, and come from a multi-cultural background with strong similarities to Europe and the US.

▶ **Guaranteed Accountability**

ITC assigns each client a project manager that is a seasoned IT professional with proven project management experience.

NEARSHORE DEVELOPMENT - DELIVERY WITH A DIFFERENCE

The Development Services Center's Nearshore division delivers cost-effective project-based software development solutions.

The Development Services Center's senior-level project management capability allows us to deliver a solution which is on-time and in your defined scope. Project managers closely monitor the production schedule and provide regular updates to give you complete project visibility.

ITC is a comprehensive service provider with global reach. The Development Services Center's support has facilitated ITC's ability to deliver a wide-range of cost-effective solutions to companies in North America, Europe, Asia-Pacific, and Latin America.

The Development Services Center's thorough documentation ensures the quality, compatibility and serviceability of your project.

Oracle ERP, HRMS and CRM

The Development Services Center delivers a wide range of customized Oracle ERP, HRMS and CRM application solutions to fit your business needs and functional environment.

▶ **Tailored Solutions, Extensions, Migrations,**

Integrations, and Localizations: ITC has a wealth of senior-level global Oracle ERP solution expertise. By working through the Development Services Center, your company can leverage the ITC staff's collective experience and expertise to improve your business processes.

▶ **Data Conversion/Data Migration:** ITC's experience in working with a wide-range of applications and platforms allows us to efficiently convert data between platforms while ensuring the integrity of your data.

▶ **Applications Tailoring:** ITC can increase the capacity and scope of your company's ERP, HRMS or CRM solution by tailoring or extending your applications suite to better meet your business objectives. As an Oracle Certified Advantage Partner, ITC ensures

that your newly tailored or extended applications solution integrates seamlessly with Oracle.

- ▶ **Workflow:** The Development Services Center streamlines your company's workflows by automating your billing, expense approval, drop shipment, or other business processes. Our team optimizes ERP integrations by drawing on the experience gained from ITC's partnerships in global ERP implementations, upgrades, and customizations.
- ▶ **Portal development and Internet based applications:** The Development Services Center can deploy public or private portals to provide secure real-time access to mission critical data, improve web-content management capability, or increase speed-to market of web-based products.
- ▶ **SOA-based integrations:** ITC also delivers service oriented development. By using the Oracle BPEL tool, we can help you integrate your organization's systems according to the architecture that best fits your needs.

J2EE and JAVA Methodology

The Development Services Center puts a team of J2EE and Java programming specialists at your service for developing, managing, and supporting multi-tier or server-centric applications. Our proven implementation methodology ensures that value is added during each project phase.

- ▶ **Analysis:** The Development Services Center will conduct a comprehensive review of your business objectives to define and fulfill your system requirements.
- ▶ **Engineering and Design:** Based on the evaluation of your environment, ITC will develop a systems architecture and then define the programming process and components necessary to ensure efficient and on-time deployment of that architecture.
- ▶ **Development:** As a team of J2EE and Java specialists collaborate to implement your solution, an ITC project manager coordinates their efforts to ensure

that team production is aligned with delivery and that budgetary requirements stay on track.

- ▶ **Testing and Quality Assurance:** Test cases are defined based upon your business requirements to ensure seamless integration. Unit, integration, and regression tests ensure your solution is delivered effectively and error-free.

STAFF LEASING

The Development Services Center provides organizations with an excellent way to fill long-term technical and functional resource needs through its staff-leasing program. The concept is simple:

- ▶ You contract the resources you need: Java developer, DBA, JBOSS administrator, Applications developer, or whatever skill set you require through our Development Services Center, and these personnel work for you on a full-time, dedicated basis.
- ▶ In collaboration with an ITC project manager, you manage these resources while ITC manages all human resource-related administrative functions.

Development Services Center staff work the same business day as New York, and are supported by the North American-South American LAN/WAN infrastructure that allows for instant telephone communication with your team. Staff leasing provides you with a cost-effective way to access and manage skilled resources; US-based resources can also be leased at competitive rates.
