

For Immediate Release – April 28, 2009

IT CONVERGENCE Focuses on Bolstering Competitiveness at Collaborate 09

IT Convergence (ITC) is once again proud to be an exhibitor and featured session presenter at the Collaborate 09 conference in Orlando, Florida. Brought to you by the OAUG, IOUG, and Quest, Collaborate is quite simply the Oracle community's most important grass roots event.

"The economy is putting a premium on competitiveness, and that's why our experts are profiling solutions that are all geared towards helping companies become more competitive," explains Patrick Krause, IT Convergence founder and President.

IT Convergence functional, technical and business experts will deliver a total of 10 presentations at Collaborate 09. Topics range from ITC's internal use of Oracle, to the latest in business intelligence, to global solutions for Oracle Financials and Oracle HRMS.

"We're giving clients as many technology tools to attack the crisis as possible. We're sharing our experience with our own upgrade to R12, and we're telling our story of how Oracle transformed us into a true global organization. We're also helping companies get up to speed on things that can really help their bottom line like Oracle Financials Advanced Collections and a host of Business Intelligence solutions. You can even stop by booth **4151** to win a free credit to an OAUG-Sponsored Oracle Applications Workshops," details Krause.

The OAUG and IT Convergence will be teaming up to host a series of Oracle Applications Workshops during the second half of 2009. These classes cover current topics like R12, 11g and OBIEE. All classes are open to the public, but OAUG members will receive a discount. For more information about these classes, or to register for a chance to win a free Public Training Seat, please stop by **booth 4151** while at [Collaborate 09](#), where the IT Convergence team will give you the of details.
