

- Create reports quickly
- Get data with more detail
- Improve productivity

Go to the next level with IT Convergence Discoverer 10g Upgrade services

Oracle Discoverer 10g Upgrade

IT Convergence offers Oracle Discoverer 10g upgrade services to help companies take full advantage of the new features of the latest release of this powerful reporting tool. Oracle Discoverer 10g provides unparalleled visibility into an organization's mission critical data.

Oracle Discoverer 10g is the largest and most robust edition of Oracle's ad-hoc reporting tool, and it offers users more analytic features and much faster query times than any previous release. Partnering with IT Convergence ensures that your upgrade to Oracle Discoverer 10g is smooth and efficient.

UPGRADES

Although it is no longer supported by Oracle, Discoverer 4i is still commonly used by today's businesses. IT Convergence will upgrade your environment to a fully supported version of Oracle Discoverer that is far more versatile than its predecessor. Specifically, upgrading to Oracle Discoverer 10g will improve your organization's ability to publish and distribute reports and to drill down into the details of those reports.

Most importantly, users' productivity will improve because of Oracle Discoverer 10g's performance enhancements.

Major Oracle Discoverer 10g Functional Enhancements:

- High Fidelity Printing: Generate professional looking documents
- Enhanced Report Parameters: Cascading and optional parameters
- Direct Report Distribution: E-mail workbook results directly to co-workers
- Enhanced Drilling: Drill-down to any attribute in a business area
- Stoplighting and Thematic Shading: Quickly view key performance indicators
- Saving in Oracle Discoverer Viewer: Customize directly from the lightweight Oracle Discoverer Viewer
- Drag and Drop Functionality: Add items in the Oracle Discoverer Viewer by dragging them directly into a worksheet
- Plus 20 additional usability, performance, and stability features

PERFORMANCE ENHANCEMENTS

The increased power of Oracle Discoverer 10g's new features is matched by its improved performance. Based on our own testing, IT Convergence has determined that upgrading from 4i to 10g may cut report execution time by more than half in some cases and, on average, drop report execution time by an average of 20%.

The SQL generation engine has been completely rewritten for Oracle Discoverer 10g. Oracle Discoverer 4i generated queries that returned too much data and were difficult to optimize. This less-than-optimal SQL generation method increased load on the entire system architecture, reducing response time. In Oracle Discoverer 10g, generated SQL is much more efficient, reducing execution time and load on the database and application servers.

Oracle Discoverer 10g's new SQL trimming feature removes unnecessary joins and columns from queries. IT Convergence designs workbooks that take advantage of these features to greatly reduce query run time and increase concurrent user capacity.

Whether you use Oracle Discoverer with Financials, Operations, Human Resources, Purchasing, Manufacturing, Activity Based Management, or any of the other E-Business Suite modules, upgrading to Oracle Discoverer 10g will improve user productivity. Moreover, Oracle Discoverer 10g's new features will provide decision makers with improved visibility into mission critical data.

THE ITC ADVANTAGE

IT Convergence offers flexible, value-added Oracle Discoverer upgrade services. Our Oracle Discoverer specialists will configure your environment so that existing hardware may be used to run both Oracle Discoverer 4i and 10g implementations simultaneously. This will save the cost of additional hardware upgrades, while allowing users to perform acceptance testing without losing productivity. After users have acquired the skills they need to use the new system, the seamless transition to Oracle Discoverer 10g will come naturally. ITC's upgrade solution includes assistance with deploying a new Oracle Discoverer environment, educating users on using new features effectively, and providing thorough documentation of all customizations and upgrade steps. We offer on-site or remote upgrade options depending on your needs. Moreover, ITC can often complete the upgrade process in less than a week, depending on testing requirements.

Contact IT Convergence today, and make the first step toward retaining vendor support and taking advantage of Oracle Discoverer 10g's new features.

ORACLE DISCOVERER END USER EDUCATION		
IT Convergence Education Services offers instruction that will provide end users with the critical skills they need to take advantage of Oracle Discoverer's versatility. Key training topics include:		
Creating and Managing Ad-Hoc Queries	Applying Conditions and Using Parameters	Creating Group Sorts and Calculated items
Analyzing Data with Drill-Downs and Graphs	Customizing, Importing, and Exporting Reports	Managing the End-User Layer Effectively
