

Accelerating Oracle E-Business Suite migration to Oracle Cloud Infrastructure

Why not run your EBS application on systems that are purpose-built to run the workload faster, better, more securely, and more cost-effectively?

Why IT Convergence for EBS to OCI Migration

Oracle's Cloud Solutions Provider Expertise (CSP) officially recognizes IT Convergence's expertise to build, deploy, run, and manage Oracle and non-Oracle workloads on Oracle Cloud Platform. We can not only architect OCI for our clients but work with Oracle on their behalf to provide the most value for their purchase - all under a single contract.

All Oracle services under a single contract and single point of contact

Pre & Post migration optimization

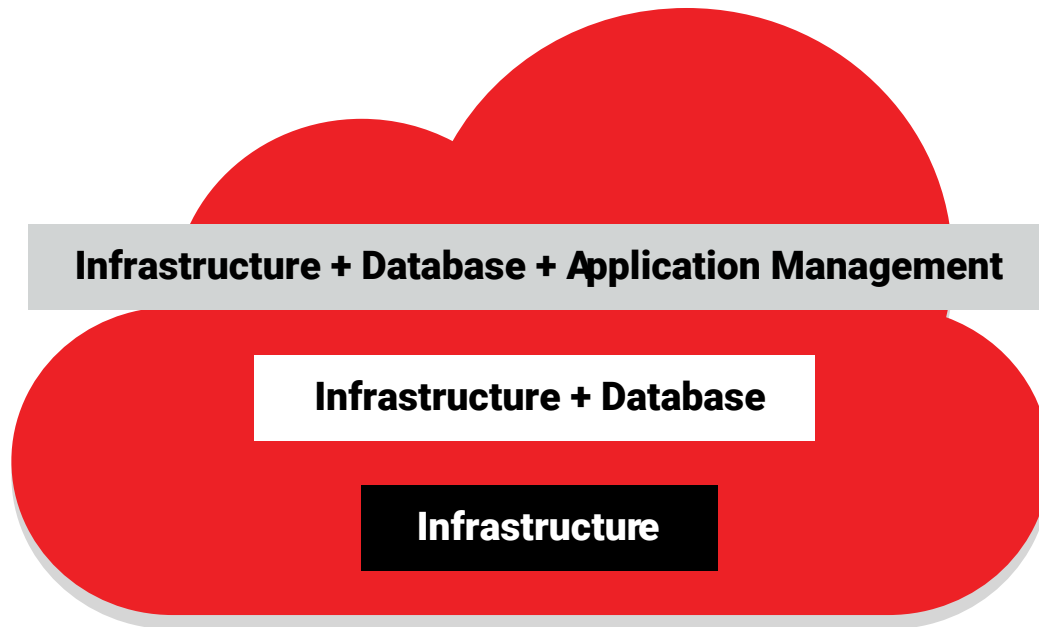

First time right solutions with -proven methods, IPs & accelerators

Accelerate migration by upto 50%*

Minimum downtime during execution

We are recognized in the Gartner Magic Quadrant for Oracle Cloud Applications Services, Worldwide 2020

Disaster Recovery (DR) in the cloud

Benefits:

- Reduces revenue loss
- Better reliability and availability
- Reporting capabilities in a DR instance

Development (DEV) Environment in the cloud

Benefits:

- Reduces time spent on tactical tasks
- Better scalability
- Lowers resource utilization
- Less money spent on storage

EBS in the cloud - IaaS + PaaS

Benefits:

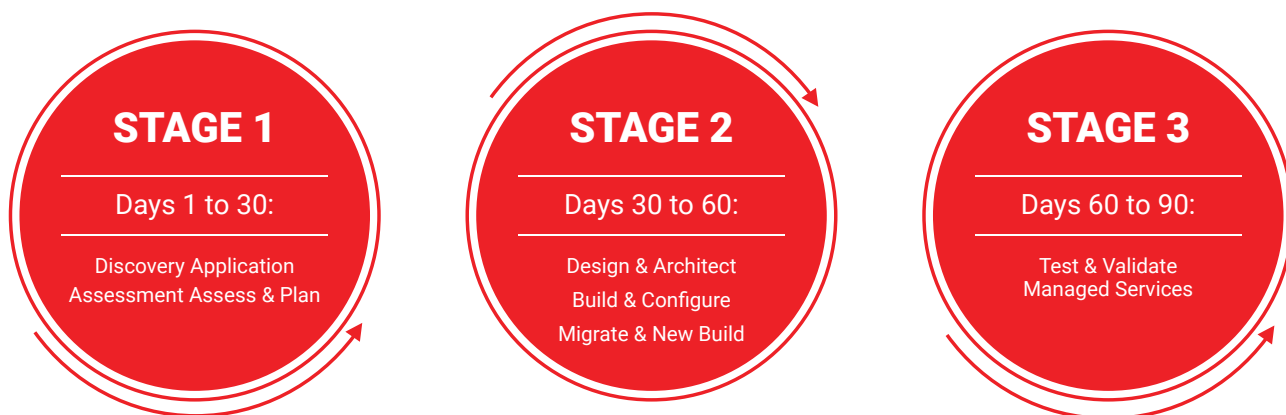

- Lower maintenance costs
- Reduces the strain on IT
- Improved performance
- Modern infrastructure

Success Story

A market leader in the recreational boating and marine industry company experienced the need to expand its on premise IT environment to OCI. They approached IT Convergence to help their growing infrastructure requirements. With our deep expertise in OCI, assessed the customer's challenges and proposed to host their Oracle and non-Oracle workloads on OCI. We helped the organization migrate over 250 Oracle and non-Oracle workloads from on premise to OCI. As a result, the company didn't need to make new investments in hardware. It moved smoothly from a Capex to an Opex model and lowered its total cost of ownership with minimum downtime.

Our Approach

The first question most businesses have when considering the move to cloud is, how long will it take? After all, the last thing you want is to cause delays when you're attempting to speed up the procedure and make things more efficient. While every business is different, we are able to provide a guide to the approximate time scale when making the switch.

With you every step of your journey

IT Convergence is a global Oracle Platinum Partner & one of the select few Oracle Cloud Solutions certified partners in North America with a comprehensive service offering across all three pillars of the Cloud (IaaS, PaaS, SaaS), including Consulting/Advisory, Private Cloud (Hosting), Managed Services, Integration, Business Intelligence/Analytics, Development, Robotic Process Automation, Testing, Training, and Change Management services.
