• OBIEE 12c
• Oracle Cloud Infrastructure (OCI)
• Informatica

INTRODUCTION

The client is a global leader in the marine industry with over 16,000 employees worldwide. They design and manufacture boats and advanced marine propulsion systems, offering award-winning solutions to optimize the on-water experience for their customers.

CHALLENGES

The client had a complex technology footprint with multiple subsidiaries running OBIEE 12c and Informatica. They wanted to migrate to OCI to achieve high availability, scalability, and improve the performance of their applications. It was a challenge to scale without compromising efficiency and repeatability in process and architecture.

SOLUTION

IT Convergence developed a comprehensive OCI migration plan and handled everything from application migration, data conversion, to testing. The OBIEE 12c to OCI migration was a global transformation project and required seamless coordination between IT, Business and Vendors. Working closely with the client, ITC was able to architect production deployments and ensure a smooth migration that reduced outages and disruption to the business.

RESULTS

• 20% faster reporting with higher availability and scalability
• Seamless interoperability in a multi-cloud architecture
• Minimal production cutover downtime and end-user disruption
• Scalable and repeatable future migrations now possible without the need for outsourcing
• Eliminated unnecessary dashboards and reports

ITC ADVANTAGE

• ITC's deep expertise in OCI enabled successful migration

• ITC's effective change management ensured business continuity without any disruption to daily operations
