INDUSTRY

Security & Logistics

ITC SERVICES

- Professional Services

CHALLENGES

Prosegur is undertaking an ambitious digital transformation journey to maintain its leading position in the security industry. A global initiative was launched to implement Oracle Fusion Cloud solutions replacing the existing Oracle EBS instance was launched. As part of the program preparation, the client needed to gather the requirements for the main operations, including United States, Brazil, Argentina and Spain, identifying potential gaps, and setting guidelines for the Oracle Fusion Cloud implementation.

SOLUTION

As the organization responsible for Prosegur's Oracle EBS managed services, ITC leveraged the knowledge of current business processes to support the client in this strategic initiative.

ITC performed a detailed assessment of the client's existing Oracle EBS instance, evaluating current configurations, customizations, integrations, extensions and modifications for each country.

ITC evaluated global, local and legal requirements and mapped them with Oracle Fusion Cloud features, supporting Prosegur in the definition of the future global core operating model.

ITC also supported the definition of the program strategy, including proposed implementation roadmap, effort and investment estimates.

RESULTS

- Clear understanding of global, local and legal requirements, leveraging ITC's experience of client's business processes.
- Global core operating model definition and detailed guideline for implementing Oracle Fusion Cloud features
- Complete list of gaps and integration architecture
- Predictable path for Oracle Fusion Cloud Global deployment
